

Toyota Management System (TMS) Grade IV Certificate

Toyota's automobile production method, known as the Toyota Production System (TPS), is renowned worldwide for its efficiency in improving quality, productivity, and delivery speed. While applying TPS to production and back-office functions, they developed Toyota Management System (TMS) to significantly improve productivity and reduce indirect costs in white-collar workplaces.

TMS is practiced by Toyota's top management team, managers in production and indirect functions such as design, production preparation, and sales. This program will equip the participants with the TMS knowledge and skills to achieve improved results and transform your company into a stronger and better one.

Institute	TMS & TPS Certificate Institution of Toyota Engineering Corporation - Japan
Materials	Printed Textbook
Language	English Medium
Format	Instructor-led Live Online
Audience	International

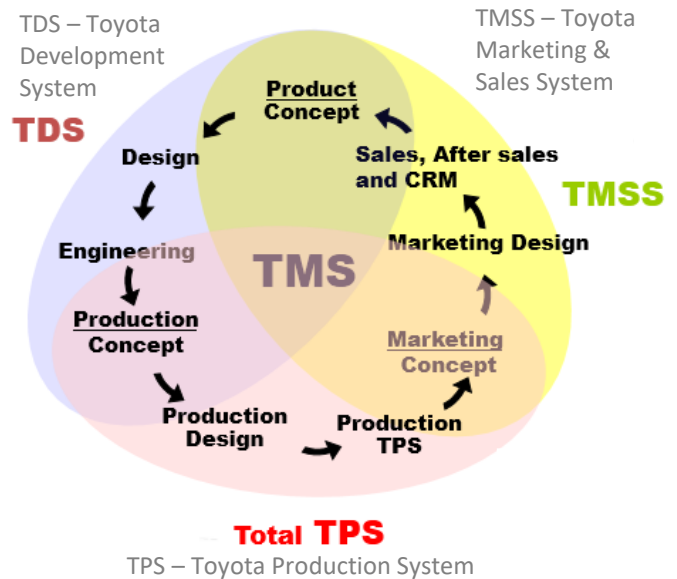

**TMS is not just about results.
It is about the process of achieving the results.**

Toyota Management System (TMS)

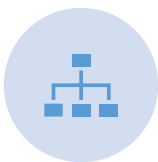

The Toyota Management System (TMS) is a comprehensive approach to a management methodology that can be applied in any industry or workplace. TMS is the underlying management system of Toyota Production System (TPS), Toyota Development System (TDS) & Toyota Marketing & Sales System (TMSS). In this program, you will learn how to "Yarigai," or turn ideas into practice and achieve workplace satisfaction.

TMS is not just focused on managerial results, but also on the process of achieving those results. It encourages personal growth and self-actualization through a way of thinking based on respect for human nature

TMS boosts productivity and reduces indirect costs through the implementation of Visual Management Tools and a method for total management, which facilitates continuous improvement (Kaizen) in the workplace and creates a supportive environment for people.

Training Program Focus Areas

Visualization of action:
Policy development, daily management, and visualization of tasks

Creation of a better workplace: Communication and leadership

Creation of values:
Customer focus and commitment to results

Emphasis on Kaizen mindset: Identifying waste, organizing groups, and problem-solving skills

Emphasis on quality of work: Statistical thinking and own process completion

Creation of profits: Systems for improving productivity and generating profits

Why TMS Grade IV Program

- ✔ **Senseis with Extensive industry experience:** With consultants who have worked in senior management positions at Toyota, you can be confident that the training you receive is grounded in real-world experience and expertise.
- ✔ **Comprehensive training:** Your training will cover a wide range of topics related to total Toyota Management Systems, including lean management, process improvement, and problem-solving techniques.
- ✔ **Networking opportunities:** By participating in our training, you'll have the chance to connect with other professionals in different industries and different countries. This will help build valuable relationships that can support you in growing your career.

Meet Your Sensei

After joining Toyota Motor Corp in 1979, Mr Matsudaira worked in the production technology and manufacturing division, starting as a technical expert in mechanical parts welding and integrated manufacturing processes in Japan. Then he held positions as assistant director/ general manager in production preparation and technology development for resin parts, chassis parts, electronic parts, and final assembly lines. He also served as a project leader in launching new vehicle plants in the United States and Canada. More recently, he worked as a representative vice president for Primearth EV Energy Co., a joint venture between Toyota Motor Corp and Panasonic that produces secondary batteries for vehicles. In 2017, Mr Matsudaira became a senior consultant at Toyota Engineering Corp and Toyota Management Institute. Now he is using his expertise in TPS and TMS to serve many industries beyond the automotive sector.

Learn, Discuss & Get the Right Answers

- ✓ Expert guidance: The TMS Senseis (Gurus) are knowledgeable experts who can provide personalized answers and guidance to help participants understand and implement the concepts they have learned in the training.
- ✓ Opportunity for clarification: Asking questions can help participants clarify any misunderstandings or areas of confusion they may have about the material.
- ✓ Support for implementation: By offering guidance on how to implement the concepts learned in the training, the TMS Senseis can help participants apply what they have learned in a practical setting.

Authentic Knowledge with Simpler Illustrations

- ✔ The TMS program is based on the most current knowledge: This means that the information in the textbook has been carefully researched and reviewed by experts to ensure that it is up-to-date and accurate.
- ✔ It is developed by experts: The textbook has been written by subject matter experts who have a deep understanding of the material and are well-versed in the latest research and developments in their field.
- ✔ It has been verified for accuracy: The content in the textbook has gone through a rigorous review process to ensure that the content is accurate and reliable. This may include fact-checkings, peer reviews, and other quality control measures.
